## XCELTHERM®TLX Heavy Duty System Cleaner

“Super” cleaning agent for systems with that require removal of heavily degraded fluid that has caused excessive carbon and sludge. This low temperature cleaning leaves the system with a bare metal finish on internal piping in only one day. Drain, flush and refill the system to return it to full efficiency.

### Advantages

- Replace 10% of system volume with Xceltherm®TLX
- 99% effectiveness at 125°F for 8 hours
- For excessive carbon/sludge removal
- Compatible with all common materials of construction
- System flush required before heat transfer fluid replacemen

### Typical Property Table

| <b>Key Temperatures</b>                          |                        |        |
|--|------------------------|--------|
| Maximum Bulk Operating Temperature               | 482°F                  | 250°C  |
| Flash Point (PMCC)(ASTM D93)(min)                | 460.4°F                | 238°C  |
| Pumpability, at 2,000 mm <sup>2</sup> /s (cSt)   | 48.2°F                 | 9°C    |
| Pumpability, at 300 mm <sup>2</sup> /s (cSt)     | 77°F                   | 25°C   |
| Normal Boiling Point, 10% fraction               | >572°F                 | >300°C |
| <b>Physical Properties</b>                       |                        |        |
| Appearance                                       | Slightly turbid liquid |        |
| Odor   | Faint amine            |        |
| Density at 25°C (77°F), pounds/gallon            | 7.26                   |        |
| Specific Gravity, at 25°C (77°F) range (typical) | 0.87                   |        |
| Kinematic Viscosity at 40°C (104°F) (ASTM D445)  | 90-100 cSt             |        |
| Kinematic Viscosity at 100°C (212°F) (ASTM D445) | 5.0-7.0 cSt            |        |
| pH (10% in IPA/Water)(max)                       | 10.0                   |        |
